LANGUAGES

Ukrainian — Native
English — Intermediate (B1)

CORE SKILLS

- Cross-platform mobile
- Performance-critical UIs
- Realtime UX (WebSockets)
- REST APIs & OAuth 2.0
- AI agent workflows

TECH STACK

Mobile
React Native, Expo, TypeScript, tab navigation, offline-first storage, PDF generation, in-app subscriptions, App Store release

Frontend
React, Vue.js 3, Pinia, Vuex, Vue Router, JavaScript (ES6+), HTML5, CSS3

Backend
Node.js, Express, REST APIs, WebSockets, OAuth 2.0

Data
PostgreSQL, SQL, query optimization, indexing

AI tools
Claude Code (agent team, CLAUDE.md rules), Gemini, ChatGPT

Tooling
Git, Vite, Webpack, npm, Postman, Chrome DevTools

INDUSTRIES

- Restaurant & hospitality POS
- Retail
- Field service & invoicing apps

EDUCATION

Front-End Development Program
Cursor Education · 2023

BEng, Civil Engineering
Kyiv National University of Construction and Architecture · 2018–2022

PROFESSIONAL SUMMARY

React Native Developer with **4 years of commercial experience**: 3 years of frontend and full-stack development on a cloud POS platform used by **1,000+ restaurants and stores across Ukraine** (deputy team lead in a team of four), and 1 year of cross-platform mobile development with React Native, Expo and TypeScript. Built and shipped **FieldQuote**, my own subscription app, now **live on the App Store**.

EXPERIENCE

React Native Developer
2025 – Present · Remote

Freelance & Own Products

FieldQuote — Invoices & Quotes · App Store · fieldquote.org

- Designed, built and **launched on the App Store** a quoting and invoicing app for contractors — React Native, Expo and TypeScript, solo from idea to release.
- Offline-first with on-device data; on-site quotes from a saved catalog, client e-signatures, **PDF generation** shared via SMS / WhatsApp, quote-to-invoice in one tap, payment reminders and analytics.
- Monetized with **monthly and annual Pro subscriptions** (in-app purchases); PDF translation into 5 languages; Android version coming to Google Play.

Client projects (under NDA)

- Developed cross-platform mobile apps for clients with React Native, Expo and TypeScript — features, navigation, API integration and delivery.

Frontend / Full-Stack Developer
May 2023 – Jun 2026 · Remote

SkyService POS

Cloud POS platform for restaurants and retail — used by 1,000+ venues across Ukraine.

- Acted as **deputy team lead** in a team of four — covered for the team lead, unblocked teammates and made day-to-day technical decisions.
- Cut catalog render time for **1,000+ items from 10–20 s to under 1 s** by redesigning list rendering and reactive data flow on low-end POS devices.
- Built **realtime POS and kitchen display (KDS) screens** over WebSockets, handling **100+ orders a day per venue**.
- Replaced legacy polling with async/await, **eliminating a recurring class of race-condition bugs**.
- Implemented **Google and Apple OAuth sign-in**; built the marketplace module — PostgreSQL, Node.js / Express REST API and UI.

AI-ASSISTED ENGINEERING

- **Own team of AI agents in Claude Code**: a PM / orchestrator plans and splits the work; backend, frontend and mobile agents implement it; a pre-tester reviews the code and a QA agent tests it. The agents have already **caught and fixed real bugs** before release — e.g. a missing OAuth `state` / CSRF check.
- A routine-automation agent checks my email and monitors project status. CLAUDE.md rules keep code consistent; every change is verified on a device or in the browser — **FieldQuote's MVP took ~1 week** instead of 1–2 months.
